THE WHEAT DEAL. No More Storage Room for Grain to be Had in Chicago.

CHICAGO, June 8th .- The Inter-Ocean to morrow will say: The regular Chicago el-evators are now practically inaccessible to grain, while the prices of wheat are up, and more shipments are coming. It is esti-mated that 28,000,000 bushels are refused storage room in Chicago, and there are 22,000,000 bushels of grain in store.

The average daily business in the han-

dling of receipts and shipments of grain is about 2,000,000 bushels. This leaves 4,000,000 bushels storage room yet unoccupied, out this is all well held and unobtainable The result of this closing of facilities fo storage has been to close up two railroads for the receipt of grain, and possibly three roads more will be so blocked as to stop

The interview with Senator Stanford of e subject of co-operation, which appeared n the New York Tribune on May 4th, has seen republished, with additions, in pamphlet form. In its completed shape, this dissertation is well worthy of study. It is st. It is a business man's solution of a business problem. It is a proposal by one of the chief employers of the country to abolish the employer class. Clearly, ther can be no question of self-interest in such an effort, and it deserves a careful and unrejudiced examination. In the additions to this interview, Mr Stanford meets the objection that his ideas are pleasant but impracticable. He supplements his exposition of principle careful study of methods. The diffic pointed out are frankly admitted and neans of overcoming them explained. The great obstacle in the way of successful peration we have always felt to be the lack of managing ability. Such ability is rare, and when it exists it commands a high price. It either organizes an enter-prise and secures the prefits for itself, or it

is employed by capitalists at a liberal salary. That salary co-operative associations are generally unwilling to pay. The income of manual labor is their standard of just repruparation and they are inclined. of just remuneration, and they are inclined to regard the demand of brains for a large share of the profits as extortionate. Hence they are liable to be ill-served, and compared with ably-directed private establishents they are at a disadvantage all alon the line, from the purchase of materials to the sale of the finished products. Senator Stanford recognizes this diffi-ulty, and freely admits that it must be overcome before co-operation can succeed.
'I think," he says, "I have observed a

eluctance on the part of men whose lives have been spent in productive labor to recognize clearly and fully the difference of capacity among men. Co-operation will be a failure without such recognition. Co-op-Prospect House, June 8th.—The President trolled industriously to-day, but caught only one three-pounder. In the University at Palo Alto there will be a chance to try the experiment on a magnificent scale. If that institution realizes the hopes of its founder, its graduates ought to come very near a solution of the social problem.

The bill introduced by Mr. Stanford in the Senate last December provides in detail for all the contingencies which workingmen are likely to meet in associating nemselves for joint enterprises. They may ave moneyed capital, or other property for nothing but their labor. They may pay themselves by proportions of the profits or by fixed wages. The bill in question, by erecting a tariff barrier at the boundary line of that Georgia village, to the exclusion of the general trade of the country, is an invasion of the vital principles that bind sovereign States into one indissoluble whole. Whenever by law we enable one section to grow fat by spoiling another, we do injury to the theory of a republic. It is enough that commerce is self-regulative, and that its decrees are natural; any attempt to regulate it, or divert them, only cripples the trade of the

THE Oroville Mercury says it is a pretty good sign of a "boom" when a man can sell half his land to-day for as much as he asked for all of it a year ago. "It is the right kind of a boom when property of all kinds has doubled in value and made the owners that much richer if they care to sell out. This is the kind of a boom that has struck Oroville, though our merchants may find it is but little livelier than before a united effort was made in this locality to put our best foot foremost." That is one kind of a boom, but speculation in real estate is a symptom, not a cause. The genuine boom is the outgrowth of faith of the people in a given section; not only faith by strangers, but faith by the old residents. The people who come to dwell with us because of our commercial, climatic and industrial advantages create the boom. It is seeking for homes by them that causes advances in values. The primal essential of a boom in California therefore, is the inquiry of the stranger, and its fruition begins when he is convinced and comes to live with us, bringing in his family, his capital, his flocks and herds, his energy and his faith in the land. What we need to do, therefore, is to enhance the invitation to the stranger; to make it so strong and convincing that he will confess our claims and join hands

SAYS the Philadelphia Times: "The time has come when the American people should exercise the right to discriminate in regard to those who seek homes on American soil. We still have room for industrious, law-abiding, liberty-loving, self-sustaining foreigners. We have none for paupers, criminals, revolutionists and Anarchists." And all true lovers of the Republic and its free institutions concur.

FURTHER IMPROVEMENTS CONTEMPLATED The rapid growth of the RECORD-UNION and the WEEKLY UNION in circulation—which is wide, extended and constantly expanding in its far-reaching and genera character, and augmenting in its local im portance and extent, greatly exceeding that of any other interior journal, make the demands upon the mechanical portion of the office very chanical portion of the office very ortance and extent, greatly exceeding heavy. The increasing rail facilities for early dispatch of these papers to the chief sections of Central and Northern California, augment the demands, and make it necessary that our press facilities should be increased. With this fully is view, it is in contemplation to procure for the two journals a new perfecting press of the two journals a less percentage the most rapid and economic pattern, with folding attachment. The two presses in use by the RECORD-UNION and WEEKLY UNION are fine pieces of mechanism, but it is desirable to supplement them, or replace them, as stated, with a perfecting press of greater speed, in order to meet the growing importance of the paper and its in-creasing circulation, and to enable it to go to press at a later hour and thus furnish more early morning dispatches. The reference to presses very naturally recalls the inquiry this office has several time entered upon regarding water power for presses, lathes and machinery in general in this city. We have found that some doing wonders in this state.

It is Decided to be Exempt From Execution on a Homestead.

The Supreme Court filed an opinion ves erday in the case of Fitzell vs. Leaky that is of more than passing importance. An injunction was sought by the plaintiff Leaky, who, in his own capacity as Sheriff, attempted to sell the interest of Fitzell in a water ditch and the water flowing in it. The ditch had been constructed jointly by Fitzell and one G. F. Kelly on Fitzell's land, on the understanding that their interests were to be three-quarters and onequarter respectively, each to bear a proportionate share of the expenses. Kelly having expended \$275 more than his share, sought to recover through suit the difference, and was successful in his contention. Execution was issued upon the judgment, prior to obtaining which Fitzell had filed a homestead claim upon his place, and there-upon sought to prevent satisfaction of the Kelly judgment by injunction. The Supreme Court decided that the action of the Supreme Court decided that the action of the Superior Court in holding the water ditch and the flowing water to be appurtanances of the homestead should be affirmed, as there was nothing in the relation of Kelly and Fitzell that made the water assets any subject to lien. STATE OF CALIFORNIA, EXECUTIVE DEPARTMENT.

WHEREAS, AT A SPECIAL ELECTION held in the State of California, in accord ance with law, on the twelfth day of April, A D. 1887, there was submitted to the people of the State of California for their ratification or ejection, three proposed amendments to the onstitution of the State, numbered "One 'Two" and "Three."

And whereas, said proposed amendments to he Constitution were published according to

And whereas, the Secretary of State having on the 25th day of May, A. D. 1887, certified to me that the vote cast at said election on said proposed amendments to the Constitution, acording to the returns on file in his office, was

Against Amendment Number One .......... 41,367 Against Amendment Number Two......43.005 Against Amendment Number Three ..... 34.156

Now, therefore, I, WASHINGTON BART-LETT, Governor of the State of California, by rirtue of the authority conferred upon me by law, do find that said proposed amendments to he Constitution, Number "One" and "Two, were rejected by a majority of the qualifie electors voting thereon at said election, and that said proposed amendment Number "Three hereinafter given), was approved and ratified by a majority of all the votes cast at said elec ion. And do further declare and proclaim that said proposed amendment Number "Three" to the Constitution was approved and ratified as a part of the Constitution of the State of Califor-

Amendment Number Three.

Section Eight, of Article XI., of the Constitution of the State of California, relating to the framing of a charter for cities of more than one hundred thousand inhabitants, and for cities of over ten thousand and less than one hundred thousand inhabitants.

Resolved, That the Legislature of the State of Resoured, That the Legislature of the State of California, at its regular session, commencing on the third day of January, A. D. eighteen hundred and eighty-seven, two-thirds of all members elected to each of the two Houses of said Legislature voting in favor thereof, hereby propose that Section Eight, of Article IX. of the Constitution of said State be amended so as to read as follows:

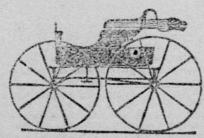

as to read as follows:

Section I. Any city containing a population of more than one hundred thousand inhabitants may frame a charter for its own government, consistent with and subject to the Constitution and laws of the State, by causing a Board of fifteen freeholders, who shall have been for at least five years qualified electors thereof, to be elected by the qualified voters of such city, at any general or special election, whose duty it shall be, within ninety days after such election, to prepare and propose a charter for such city, which shall be signed in duplicate by the members of such Board, or a majority of them, and returned, one copy thereof to the Mayor, or other chief executive officer of such city, and the other to the Recorder of Deeds of the county. Such proposed charter shall then be published in two daily papers of general circulation in such city, for at least twenty days; and within not less than thirty days after such publication it shall be submitted to the qualified electors of such city, at a general or special election, and if a majority of such qualified electors voting thereat shall ratify the same, it shall thereafter be submitted to the Legislature for its approval or rejection as a whole, without power of alteration or amendment; and if approved by a majority vote of the members elected to each House, it shall become the charter of such city, or if such city and county, and shall become the organic law thereof, and supersede any existing charter, and all amendments thereof, and all special laws inconsistent with such charter.

The Executive Committee which has been appointed to make all the arrangements for a proper observance of the Fourth met at the Court-house last evening, to hear the reports of the various subcommittees which have been appointed to work up the different details. Everything seems to work harmoniously. The committees are a work harmoniously and the state of the fatal dose of laudanum. An examination of the Army and Navy Register shows that there never was a "Major R. A. Murray" in the service. The gold watch pawned by him has been recovered, and proves to bear the monogram "E. M." on one of its cases, and it is therefore believed to be tolerably and the state of t

to be tolerably well established that his latter name commenced with "M." Referring to the mystery surrounding the case the *Chronicle* of yesterday says: "Reference was made to the fact that the private detectives A. B. Lawson and John Teague had been engaged several days pre-

vious to discover his whereabouts. It was also stated that in the afternoon an undertaken in a stranger in an unknown land by some one willing to incur the expense of detectives and burial was at the time another mystery. The detectives explained carelessly that this interest was being taken by friends—gentleman friends—of the dead man. #### THE TWO FAIRS.

A Prospect that the State and Medianics Fairs Will Not Clash.

[S. F. Bulletin, June 8th.] In previous years there has been an un-ortunate clashing on the dates of holding the two popular annual exhibitions of the products of California—the State Fair, held n Sacramento, and the Mechanics' Fair of his city. This year it was decided to have he Mechanics' Fair begin September 1st and continue for five weeks. The State Fair Directors decided to open their ex-hibition September 12th. They desired, if possible, to avoid conflict with the dates of the Mechanics' Fair, and appointed a committee to communicate with the Mechanics Institute Directors and see if some arrange ment whereby the two fairs would not be held at the same time could be made. The Mechanics' Fair people appointed last night a similar committee and the two met to-day in the Mechanics' Institute building,

After some preliminary talk relative to to inspect the most the importance of the two exhibitions, Mr. the Pacific coast. allatin asked for the best proposition that the Mechanics' Institute people would con-sent to. An answer could be returned by to-morrow evening. If the Secretary of the State Fair thought favorable of any

So It is stated that the owner far as he was concerned he would postpone the fair for one week providing that the competing for the American cup. State Fair would open the last Monday in

Mr. Gallatin referred at length to the meeting in March of last year, when a proposition as to dates was virtually agreed upon, and then the Mechanics' Institute people refused to ratify and adopt the resolution. This resolution was to the effect that the managers of the two fairs agreed to hold their fairs at such dates as would not conflict. It was recommended in the resolution. A South Kensington vicar refused to stop the ringing of his church-bell, so that a sick woman might obtain much-needed rest. conflict. It was recommended in the resolution that the Mechanics' Fair open on the first Tuesday in Angust and close on the fifth succeeding Saturday, and that the State Fair open on the Monday following the close of the other. Mr. Gallatin said he called attention to this action last year, to show that the Sacramento people and the State Fair open on the Westminster bridge in London, while attempting to jump into the Meat in the speculative market is lower, as the flurry is subsiding. Bran and middlings are so scarce that they are selling at fancy prices—about \$30 per ton. Other feedstuffs are higher in consequence. Wool has gone up 1 cent to 2 cents per pound for some grades.

At a meeting of the Board of Directors the State Board had always been ready and willing to do all in their power to arrange

other bodies. The State people should then have communicated with the Mechanics' people direct. He felt willing to let bygones be forgotten, however, but could make no other concession than if a postponement was ordered that the State people should be a roome of their vessels.

Mr. Smith, of Sacramento, thought the proposition a fair one. To change the date the Mechanics' people will have to make a monetary sacrifice and the State people monetary sacrifice and the State people of the more transfer of ught to be willing to help bear it. It was understood that the proposit was only in the form of a recommendation; that some of the State Directors and Secretary Smith would have to be notified, and if agreeing, then a meeting of the Meinics' Institute Directors would be called to take action. The opinion was expresed that the matter of the musicians might be arranged so that the State Fair people would not have to pay over \$250. Mr. Gallatin said he felt that in order to contribute to the success of the two exhibi tions and the consequent benefit they would be to the State, he would be willing to collect from Sacramento merchants, inde-pendent of the State Directors, the amount of money asked for. The gentlemen parted with the understanding that the matter of

hange, as arranged, would be decided within a few days. The proposition briefly is for the date of opening the Mechanics' Fair to be post-poned from September 1st to September 8th; for the State Fair to open August 20th instead of September 12th, so that there will be a lapse of three days between the two exhibitions, and the State Fair people \$5 BUYS A CORD OF STOVE two exhibitions, and the State Fair people two pay at the maximum \$500 to the Mechanical Policy P chanics' Fair Directors.

And consequently incurable. It is impossible to describe her sufferings. Her body from the crown of her head to the soles of her feet was a mass of decay, masses of flesh rotting off and leaving great cavities. Her fingers festered and three or four nails dropped off one at a time Her limbs contracted by the fearful ulceration and for several years she did not leave her bed Her weight was reduced from 125 to 60 pounds Perhaps some faint idea of her condition can be gleaned from the fact that three pounds of Cos moline or ointment were used per week in dress

gleaned from the fact that three pounds of Cosmoline or ointment were used per week in dressing her sores. Finally the physicians acknowledged their defeat by this Black Wolf, and commended the sufferer to her All-wise Creator. Her husband hearing wonderful reports of the use of Swift's Specific (S. S. S.), prevailed on her to try it as a last resort. She began its use under protest, but soon found that her system was being relieved of the poison, as the sores assumed a red and healthy color, as though the blood was becoming pure and active. Mrs. Bailey continued the S. S. S. until last February; every sore was healed; she discarded chair and crutches, and was for the first time in twelve years a well woman. Her husband, Mr. C. A. Bailey, is in business at 17½ Blackstone street, Boston, and will take pleasure in giving the details of this wonderful cure. Send to us to Treatise on Blood and Skin Diseases; mailed free.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected (ocoa, Mr. Epps has provided our breakfast tables with a delicately-flavored beverage which may save us many heavy doctors' bills. It is by the judicious use of such articles of diet that a constitution may be gradually built up until strong enough to resist every tendency to disease. Hundreds of subtle maladies are floating around us ready to attack wherever there is a weak point. We may escape many a fatal shaft by keeping ourselves well fortified with pure blood and a properly nourished frame."—Civil Service Gazette.
